

➤ **Investigating the Role of Mobile Phones on the quality and utilization of prenatal and neonatal care in rural Ghana - Mobile Technology for Community Health (MOTech)**

This project was a partnership between the Healthcare Innovation Technology (HITLAB) and SPH to investigate the role of mobile phones on the quality and utilization of prenatal and neonatal care in rural Ghana, and to demonstrate that mobile phones could serve as an efficient tool for improving maternal and child health outcomes. Dr. Augustine Ankomah was the lead investigator at the School of Public Health.
